

Abiy Ahmed's Legacy & Hidden Agenda. Achieving Extremists Ethnic Oromo Objectives through Insurrection, Mass Murder, Chaos while preaching "prosperity gospel".

Part One
2/22/2023

Five years after coming to power taking over from the previous regime (TPLF/ EPRDF) and having promised to unify and lift Ethiopia out of a divisive, tyrannical, dictatorial, and ethnic regime, instead Abiy Ahmed together with his self-serving ethnocrats has plunged the country deep into a state of economic chaos, lawlessness, genocide, and unparalleled human catastrophe. Given the current downward spiraling trajectory of Ethiopia under the Abiy/Oromuma regime, it is inevitable to cause regional instability if not halted.

How did Abiy Ahmed deceive the world from appearing as a peace maker to becoming a monster who cares less for anyone else except for his own "ego" and "ethnicity"?

Many Ethiopians now believe that Abiy Ahmed is a manipulative power monger who lacks understanding and basic skills of leading a country which has a rich history, diversity, and harmony amongst its people. Numerous articles and analysts have concluded that Abiy's quest for self-aggrandizing white elephant projects lack understanding of basic human values and needs. Additionally, his clinging to the rejected ethnic apartheid system has become a recipe for a disaster. A recent New Yorker publication "Did a Nobel Laureate Stoke a Civil War" is a prime example that indicates the many failures and sheer incompetence of Abiy Ahmed Ali.

The political organization he and the extremist Oromo nationalists created (Prosperity Party) was caught on a leaked recording laying out their "convince or confuse" strategy, which is aggressively pursued by his deputy, the so-called Oromo regional head Shimeles Abdissa. Their primary target for annihilation as Shimelis states clearly on the recording are Amharas. This strategy is a carbon copy of the defunct TPLF/EPRDF regime on steroids, with its own aggressive flavor of state capture: literally controlling and taking over of Ethiopia's major institutions and the "OROMIZATION" of these institutions, uprooting of non-Oromos from their homes and lands by violence including genocide and confiscating victims' lands and properties. The instability this has caused has already bred Oromo ethnic extremism resulting in regional terrorism sponsored by the so-called Oromo regional government along all its internal and external boundaries.

The primary agents that are executing these inhumane and barbaric acts are none other than the Oromo regional special forces, extremist elements of Querro, regional cadres, militias, and other nationalist Oromo groups armed and funded by the federal government all under a coordinated hands-off operation by Abiy Ahmed himself.

Since Abiy's regime grabbed power, tens of thousands of Amharas have been brutally murdered in the so-called Oromo region. Millions have been displaced and are being exposed to subhuman conditions in settlement camps while their properties have been looted by their attackers.

Abiy Ahmed's ethnic apartheid regime's vicious and remorseless behavior has continued to escalate each day to where the primary offender of the so-called law is the regime itself. No one is safe in such a state sponsored anarchy and chaos which is primarily instigated by Abiy Ahmed, and the Oromo extremist dominated prosperity party he is leading.

Behind this madness, destruction and chaos is a tribal ideology called “Oromuma” which strives to achieve a homogeneous Oromo ethnic society by obliterating other ethnicities across all internal and regional boundaries through expansion and subjection of its victims as slaves to its ethno-fascist ideology.
